- **Noelle:** Trade 68.0%; accessories landed just under \$50/OPP.
- **Jamie:** Protection was the standout at 84.21%.
- **TJ:** 8.6% AIA close and 3 HTP; CSAT 100%.
- **Gio:** One day worked - the 25-day pace below is purely for fun.

Gio's One-Day Pace - because why not?

Gio worked one day in August. This multiplies his one-day production by 25 workdays; rate metrics stay unchanged.

KPI	Actual (1 day)	25-day pace
PPV	2	50
Upgrades	1	25
OPPs	3	75
Accessory Revenue	\$150	\$3,750
ACC / OPP	\$50.00	\$50.00
Insurance	50.00%	50.00%

Fun pace headline: 50 PPV, 25 upgrades, 75 OPPs and \$3,750 in accessory revenue. Obviously not a forecast - just a ridiculous first-day pace.
